

**SB 8200**  
**SPLIT-BODY**  
**SIDE LOADER**

**Collect Multiple Commodities  
More Efficiently and Safely**

## Largest CNG capacity integrated with our route-proven split body side loader.

Choose to make your **SB8200 Split-Body Side Loader** an alternative fuel vehicle by adding optional CNG tanks to the front, side and frame rail. Our engineering department will design a configuration that will meet your specific needs.

**88 plus DGE storage capacity that's engineered NOT to compromise interior/exterior body space, with no increase in body height or truck length.**

### 50/50 Split Hopper Design

The split hopper independently keeps refuse and recyclables or two types of trash separated.

### 40/60 Split Body Design

The body features two individual compartments with simultaneous packing and independent compartment horizontal unloading.

### Standard Expandable Loading Trough

The expandable trough provides additional loading space plus makes it easier to load yard waste, bags and bulk items.

### Smooth 8000 Family Series Body Panels

The smooth side unit design makes it easy to personalize the body with decals or signage and makes it easy to clean.

### User Friendly Side Loading

The ergonomic design lessens operator fatigue. Reduces manpower to only one operator, but maintains an efficient route time.

**The SB8200 Split-Body Side Loader was specifically designed to address customer needs for a single collection vehicle that can haul multiple commodities and eliminate the need for a second truck.**

The **SB8200 Split-Body Side Loader** is made with the same level of detail and quality as our route-proven MP8000 unit, but is specifically designed for dual stream refuse collection routes. This 40/60 split body side loader is available in 24 to 42 cubic yard capacities with many custom configurations in a simple, easy to maintain unit.

What makes our split-body the safe and efficient choice? We first start with a large volume receiving trough that allows for both loose refuse and semi-automatic cart loading. In addition, the large capacity trough is capable of dumping two carts at the same time. The split hopper features a hydraulic crusher panel that pushes larger refuse (such as cardboard) down into the body.

The **SB8200 Split Body Side Loader** offers simultaneous packing with independent compartments that allow you to individually unload payloads at mixed-use recycling centers from inside the cab.

Save route costs and reduce your carbon footprint by eliminating the need for another truck to pick up recyclables. **Give us a call at 877-445-4499 to schedule an on-site demonstration for your routes.**

### Features

- Safe, efficient and stable with full eject horizontal unloading—no telescopic cylinder
- Easy to operate controls
- Fuel efficient engine idle operation
- Low maintenance—single cylinder loading operation (patented)
- Manual and semi-automatic cart loading
- LED body and work lights
- No chassis drop frame requirement
- One of the industries fastest loading cycle
